presents expert instruction on

How to Write Successful Scientific Manuscripts

July 2nd, 2017

10am - 4pm

This 1-day workshop, presented as a pre-conference training opportunity by BioScience Writers (www.biosciencewriters.com), will be held in advance of the *International Congress on Analytical Proteomics*:

International Congress on Analytical Proteomics (V - ICAP) 2017

<http://www.icap2017.com>

Costa de Caparica, Portugal

July 3-7, 2017

The Importance of Clear Scientific Communication: Publication is the primary means of sharing your scientific research findings. Clear communication is essential to effectively share knowledge that advances scientific and medical progress. Publication is also essential to give proper credit for your research efforts and earn recognition for your scientific contributions. This personalized workshop will teach you effective structures and organization of scientific manuscripts, will enable you to more effectively prepare manuscripts for top international journals, and will review effective ways to express complex scientific ideas clearly in English.

Who Should Attend? Students • Postdoctoral Fellows • Faculty: Our workshops contain information that is important to researchers at every career stage. This scientific writing workshop has received fantastic reviews from graduate students, postdoctoral
